

Frontend-focused Software Engineer with 5+ years of experience building scalable, high-performance web applications using React, TypeScript, and modern frontend architectures.

Strong product mindset: I don't just build features—I identify user pain points, propose solutions, and drive them from idea to production.

Experienced working in cross-functional teams, owning features end-to-end, and delivering measurable improvements in performance, usability, and developer experience.

Experience

Xometry | Software Engineer

March 2022 - March 2026 - Remote

- Led the development of scalable frontend features using React and TypeScript, improving key user workflows and reducing friction across core product experiences
- Designed and implemented reusable component systems, accelerating feature delivery and improving UI consistency across the platform
- Optimized application performance through code-splitting, memoization, and data-fetching strategies (React Query), reducing load times by ~30% and improving user interaction responsiveness
- Collaborated with product and design to define requirements, shape solutions, and deliver features end-to-end
- Worked directly with clients to understand business needs, translating them into technical solutions and product improvements
- Contributed to code quality through peer reviews, enforcing best practices in architecture, maintainability, and scalability
- Improved developer experience by refining component architecture and codebase maintainability

W3 IT Solutions | Full-stack Developer

June 2021 - March 2022 - In Office

- Delivered full-stack features using React and Node.js, working directly with clients to define and implement solutions
- Improved UI/UX by proposing and implementing interface enhancements based on user needs
- Participated in code reviews and contributed to improving team development standards
- Shipped multiple product updates following modern development and testing practices

UMA Health AI | Front-end Developer

January 2021 - June 2021 - In Office

- Contributed to frontend development using React, focusing on usability and clean UI implementation
- Collaborated with senior engineers and designers to translate product requirements into functional interfaces
- Participated in testing and release processes, gaining hands-on experience with modern frontend workflows

STRAFELAB (In-Progress)

Competitive gaming matchmaking and tournament platform

- Building a competitive platform for structured matchmaking and live draft-based tournaments
- Implementing skill-based team balancing using ELO-based logic
- Developing real-time drafting flows for team creation and match organization
- Designing system architecture for matches, teams, and tournament lifecycle
- Focused on solving trust, fairness, and automation challenges in competitive gaming ecosystems

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Redux, React Query

Backend: Node.js, Express, REST APIs, GraphQL

Styling: CSS, Sass/SCSS, Tailwind CSS, Emotion, Design Systems

Data: MongoDB, PostgreSQL (basic), Prisma

Performance: Code Splitting, Lazy Loading, Memoization

Testing: Jest, React Testing Library , Storybook

Tools: Git, CI/CD (basic), Docker (basic), Webpack, Vite

EDUCATION

Universidad Argentina De La Empresa

Bachelor's Degree in International Trade

2013-2018

Colegio San Cirano

High School Diploma in Modern Languages

2007-2011
